At the Lloyd A. Fry Foundation, we have seen that ongoing assessment of program outcomes is most meaningful when its findings are used to inform decisions and strengthen a program’s work. This year’s annual report highlights grantees that have used data to make significant changes to the structure of their programs and, in doing so, are improving the lives of low-income people in Chicago. By sharing their stories, we aim to encourage and support others who join us in tackling the persistent problems of urban Chicago.

About the Foundation

In 1933, Lloyd A. Fry founded the Lloyd A. Fry Roofing Company on the Southwest Side of Chicago. During the next five decades, the company grew to become the world’s largest manufacturer of asphalt roofing and allied products, with nearly 5,000 dedicated employees in manufacturing facilities nationwide. The company was sold to Owens-Corning Fiberglass Corporation in 1977. In large part, the proceeds from the sale of the company now serve as the endowment of the Lloyd A. Fry Foundation. The Foundation has been addressing the needs of the Chicago community since 1983.

From the Chairman

What we do is not easy. And it is getting harder. Ten years ago, we had more neighborhood public schools in Chicago than we do today, and they were better funded. Hospitals serving Medicaid patients were usually paid within 30 days; today the wait time for payment is more than 80 days and climbing due to the state budget impasse; real patients are at risk because some hospitals are in danger of closing. The State of Illinois had a structural deficit ten years ago, but the budget shortfall was around $3 billion before what Fred Gertz then called “illusory strategies” to fill the budget gap. This year the comparable number appears to have doubled, our state has no legislatively approved budget at this writing, and we are running out of one-time revenue sources to meet ongoing expenditure demands.

So what is our foundation to do? We are committed to support programs that improve conditions for low-income, underserved communities in Chicago. Governments have proven to be uncertain sources of support. We have significant but nonetheless limited resources. There are no easy answers. There are no clear solutions. We can only do the best we can, every day, in all that we do.

We are wonderfully fortunate to have a fine board and a supremely talented staff. Unmi Song, our President, has been with us for all the last decade, and she is our rock. She guides us in all our most difficult decisions—often involving allocation issues: Where should we spend the grantmaking assets we have? And with an excellent administrative staff, she makes everything work. Soo Na, our Senior Program Officer and health expert, has led us to a coherent and thoughtfully focused program, nurturing medical home models of care and fostering collaborations across our city. Jennifer Miller Rehfeldt, our employment program officer, is new to us but wise to the employment picture in our city; she inherits a carefully targeted program for which we are indebted to her predecessors, Sharon Bush and Oswaldo Alvarez. Marcia Festen, a consultant who leads our arts learning program, has experience, judgment and a wonderful sense of all that is happening in our city, and she inherits a fine program of which Sydney Sidwell was a principal architect.

Our education funding has been designed largely to support programs in CPS. Since we cannot now be certain even what the near future will bring to CPS students, we find it difficult to know where best to devote our education funds. We believe that good leadership at the school level will always be critical, so we support training programs for future principals. We support professional development for classroom teachers because good classroom teaching is always important, and we support a few rigorous academic enrichment programs because we feel we must—there are so few opportunities for some students.

Because we believe that diversity is important to all the structures of our society, we support diversity every place we can.

I am proud of our alumni, former foundation program staff, who are now doing important work all over the country supporting the same goals we support. This group notably includes Sharon, Oswaldo, Sydney, Ernest Vasseur and a host of others.

We just have to keep trying to do the absolute best we can, every day, in all that we do.

Howard M. McCue III

From the President

They refused to settle for good enough. That is true of each of the four grantees highlighted in this year’s annual report. They had good programs, considered among the best in the city. Yet, they continued to improve the services they provide to low-income students and families throughout Chicago.

The Academy for Urban School Leadership (AUSL) revitalizes struggling Chicago public schools, in part by training those schools’ teachers. But AUSL came to realize that strong teachers needed to work in tandem with principals. So it transformed the way it supports its principals—with an approach just as deliberate as the one it uses for its teachers—providing them with the individualized assistance they need to be strong school leaders. The principals benefit, and so do their students.

A few years ago, Access Community Health Network set out to improve the way it provides care to 175,000 mostly low-income Chicagoans. Faced with delays when scheduling a clinic appointment or waiting to see a doctor, patients too often did not seek care or did not show up for their appointments. So Access streamlined its scheduling system and other operations to be more responsive to patients. Now its patients spend less time waiting for care and more time actually getting it.

For the past three decades, the Jane Addams Resource Corporation (JARC) has trained workers for long-term, living-wage careers in the manufacturing sector. It achieved that by constantly listening to and adjusting to the needs of both employers and employees. It continues to monitor the workforce requirements of manufacturing companies and to develop new programs to teach those specialized skills that enable its job seekers to be competitive.

From the Chairman

Lyric Opera of Chicago analyzed the strengths and challenges of its programs that were working in Chicago public schools. To deepen the arts experience for students, Lyric increased the amount of time its teaching artists spend with students, and it introduced a creative element where students devise and perform their own piece of operatic theater. Based on the success of this experience, Lyric is now expanding and enriching its program in high schools, and as part of the process, changing the way it works with schools, in order to collaborate more closely with the classroom teachers and to be a more valuable resource in the school.

I invite you to learn more in the pages that follow about the persistence and dedication to improving that is at the heart of all four groups.

This past year, we celebrated the retirement of a beloved board member, David A. Donovan. Dave served the Foundation tirelessly for over fifteen years. Many of you may have met him; he loved site visits! He remains connected to the Foundation as a director emeritus and we expect to continue to see him regularly. We also welcomed Jennifer Miller Rehfeldt to our Employment program. She joins us with extensive program experience from Inspiration Corporation, and she has already jumped quickly into the work of the Foundation. We are fortunate to have her on our team.

Unmi Song
Spanish is the first language for the vast majority of students at Solorio Academy High School. They can speak and read English, but are not yet proficient in the language. To boost their English language literacy skills, the Southwest Side school improved its teachers’ skills and acquired instructional materials that meet these students’ language learning needs.

“The Fry Foundation has been a strong voice in advocating for and understanding the importance of principal quality and the efforts needed to help develop and continually improve school leadership.”

Donald Feinsten, Ph.D., Executive Director, AUSL
Victor Iturralde, Solorio’s principal, says he wouldn’t have been as equipped to grasp the challenges facing English-language learners and their teachers—or as capable of addressing them—if not for a major shift in the way that the Academy for Urban School Leadership (AUSL) supports its principals.

Since 2001, AUSL has taken struggling Chicago public schools and turned them around by giving them new principals, teachers and curricula. Before working in an AUSL school, most teachers go through a year-long training program. “We create schools of excellence by developing highly effective teachers and transforming educational outcomes for high-poverty students in the lowest performing schools,” said Donald Feinstein, Ph.D., Executive Director.

But as AUSL grew from one to 32 schools, including Solorio, the organization found that to get its teachers and students to do even better, AUSL had to do more for its principals. With the support of the Fry Foundation, which helps bolster the academic achievement of low-income students in Chicago public schools, AUSL set out to change the way it develops its principals—to coach them just as intentionally as it trains its teachers.

“Historically, many urban school districts develop their teachers and just look at principals as a compliance agent. We look at our principals as transformational leaders,” said Dr. Feinstein. “We understand that you can’t have a well-run school without having a quality school leader.”

In the past, all 32 of AUSL’s principals reported to one director and met monthly as one large group. But that didn’t provide the targeted, personalized support each principal needed. Now, rather than meeting as one big assembly, five smaller groups of principals get together every month. At each meeting, one principal presents a problem his or her school is facing, such as needing to strengthen the curriculum, trying to improve student attendance or addressing diverse learners’ needs. The other principals step inside the host school’s classrooms and record their observations. Together, the school’s leaders discuss potential solutions.

It’s not just the principals who engage in this learning process. They’re joined by AUSL’s data analysts, educational coaches, and the Director of School Leadership, who oversees each group of principals and helps to ensure that the many conversations turn into action. “We’ve created a learning community where we share best practices,” said Amy Rome, Director of School Leadership.

As Mr. Iturralde and his colleagues delved into the issue of Solorio’s English-language learners, he identified the most pressing problems. Out of all subject areas, his students scored lowest in English and reading. Many of his teachers weren’t sufficiently trained in teaching language skills.

Mr. Iturralde and his Director of School Leadership decided on a plan of action. He brought on a bilingual AUSL coach to train his teachers, and their teachers in training, on instructing English-language learners. For instance, rather than translating everything into Spanish, the instructors now converse with students in English. Mr. Iturralde also secured reading materials specifically designed to shore up his pupils’ reading skills.

“AUSL has been extremely important in my development as a principal because of the individualized support that I receive,” said Mr. Iturralde. Moreover, AUSL’s new emphasis on creating better principals means creating better student outcomes—which is, after all, its primary objective, said Dr. Feinstein. “All of our students, regardless of their zip code or their circumstances, deserve a quality education,” he said.
Students at Solorio High School participate in discussions in art, English and geography classes. A representative from AUSL gets a tour of the school from Principal Iturralde and his assistant.
At first, it was clear the elementary school student in the Logan Square classroom had no interest in learning anything about opera. Yet over the course of Lyric Opera of Chicago’s residency program, the student became increasingly more engaged, recalled Lyric teaching artist Elise LaBarge. By the end of the program a few months later, “he was the one standing right next to the piano, singing at the top of his lungs,” said Ms. LaBarge.

“The Fry Foundation has always been very open to supporting and learning about our residency program, the new directions in which we’re taking it and why we’re going in those directions. The foundation enables and encourages us to keep moving forward.”

Mark Riggleman, Director of Education, Lyric Opera of Chicago
Students at Andrew Jackson Language Academy and Coleman Elementary school in Chicago rehearse for upcoming performances with professional teaching artists Juliet Petrus and Elise LaBarge.
Lyric has seen innumerable success stories like this one—a testament to the impact its residency program has had on low-income students in the Chicago Public Schools system who may otherwise have limited exposure to the arts. Lyric brings professional teaching artists into the classroom to work with students and teachers to create and perform an original opera.

One reason the residency program has had such an impact is that, several years ago, Lyric began to analyze the aspects of the program that do well and the areas that need improvement—and to adjust them accordingly. “We’re constantly in a mode of assessing what works and what doesn’t,” said Mark Riggleman, Director of Education.

Based on this ongoing assessment, Lyric, which now offers its education programs under the auspices of Lyric Unlimited, phased out its shorter-term elementary school residencies in favor of longer-term residencies in multiple grades in the same schools. It wanted to have a stronger effect on an entire school’s environment. And, in addition to teaching students music and vocal skills, residencies now include a creative element: Students learn about making opera and also create their own piece of operatic theater performed for their peers and families.

As of the 2015-16 school year, Lyric has extended its 15-week residency for an additional three weeks. The company has also brought on a creative-writing specialist to provide the teaching artists with training and tools to better guide students in writing a story that becomes the basis for their original opera.

The changes haven’t ended there. This year, Lyric has combined its elementary and secondary school residency programs into a single program, developing greater cohesion and a clearer progression of learning across grades.

Lyric has taken ownership of what it considers its growing civic duty to help Chicago public schools improve their arts education. “As cultural institutions, we have to evolve how we provide real, concrete service,” said Dr. Todd Snead, School Engagement Manager. “We have to think about how we’re working with educators on the ground.” Previously, Lyric’s four-week high school residency program taught students about how Lyric produces an opera, and they attended a dress rehearsal or performance. This year, Lyric is piloting a new, expanded high school program. Focusing on an in-depth experience with the way Lyric works, students attend an opera performance and over the subsequent six weeks create their own version of a scene or theme from that work. This season, they’ll be focusing on Romeo and Juliet. The new high school program also features visits from guest artists.

As part of the pilot, Lyric’s teaching artists will assist high school choral teachers for most of the entire school year. One school day each week, Lyric’s teaching artists will work alongside the classroom instructors, providing any support the instructor wants, whether leading warm-ups or giving individual instruction. “The old model is: Here’s a program we’ve created that we think is good for you. The new model is: We have some expertise that can help vocal teachers to be more successful. It’s a collaborative effort,” said Cayenne Harris, Director of Lyric Unlimited.
Sparks are flying at the Jane Addams Resource Corporation (JARC), a vocational training center in the Ravenswood Industrial Corridor that looks much like a manufacturer’s shop floor. As students weld metal, their industrious labor belies the hardships they’ve encountered. About half of them have served prison time; many have found themselves with obsolete job skills.

The Fry Foundation supports job training programs that position low-income workers for living-wage jobs and careers, particularly in industries that have high demand for workers. JARC is a pioneer of this sector-based job training model. Its well-regarded Careers in Manufacturing job training programs prepare low-income adults to become employed as machine operators, machine programmers, and welders. To be effective, JARC has learned that it must have deep knowledge of worker and employer issues in a sector and strong relationships with multiple employers. This helps JARC to adjust program content quickly to meet employer demands and industry standards. As a result, 90 percent of program graduates are placed in related jobs, with an average hourly wage of $12.50. Past participants stay connected to JARC and are helpful to current participants by identifying job leads and conducting mock interviews.

“The Fry Foundation has been a steadfast and engaged partner in our growth. They really took the time to understand our strategies and models, and they made a real commitment to working together.”

Guy Loudon, Executive Director, JARC
Imagine being a 42-year-old father and you’ve got three kids and you can’t take care of them because all of a sudden employers don’t need you,” said Guy Loudon, Executive Director.

For the past 30 years, JARC has helped such individuals to earn not just jobs but lasting careers in the manufacturing sector. Like the Fry Foundation, JARC endeavors to assist low-income workers in achieving well-paying careers. “JARC helps these workers migrate out of poverty and attain financial self-sufficiency through skills training,” said Mr. Loudon.

JARC has helped people to compete for living-wage jobs by constantly staying on top of the needs of both companies and workers—and by regularly adapting to serve those needs. While in its first two decades JARC provided general training in manufacturing, it learned from employers that they needed workers with specialized skills. So JARC created programs specifically devoted to welding; computerized numerical control, a machine that cuts metal; and, as of this year, brake press, which bends metal. “There are a lot of different jobs in manufacturing. We look at the ones where you can have a career path and a family-sustaining wage,” said Emily Doherty, Director of Training Services. JARC also devised a program that gives students the math and reading skills they need to enter its more advanced technical programs.

As part of its ongoing evolution, JARC realized it could do a better job of training more women for a male-dominated field. In the past two years, the organization has partnered with Chicago Women in Trades, a nonprofit that helps women earn high-paying construction jobs, to learn ways to better recruit and retain women, such as hosting all-women networking events and advocating for female hires among employers. Before that partnership, only one to three of JARC’s roughly 100 annual trainees in Chicago were women. Now, it trains 15 to 20 women a year.

JARC does more than impart technical know-how; it emphasizes soft skills. Students must consistently show up on time and with a good attitude—or risk expulsion. “I don’t want students to see this as a training facility. I want them to see this as a job,” said Juan Del Castillo, Director of Manufacturing Operations.

The numbers speak to JARC’s success: 90 percent of its trainees graduate and 90 percent of its graduates land a manufacturing job. The average starting hourly wage is $12.50.

JARC’s interest in its students doesn’t end on graduation day. It tracks graduates for at least one year and takes an in-depth look at that data, along with employer feedback, to refine its programs. This way, JARC ensures its participants obtain the credentials that employers most want their workers to have.

Recently, JARC has broadened its impact. Within the past year, it increased its Chicago training space by 25 percent, doubling the number of welding booths, and launched new facilities in Addison, Illinois, and Baltimore, Maryland.
JARC students receive training in computer skills, welding and machining.
On a recent visit, a patient at the Little Village site of Access Community Health Network seemed shocked, recalled Dr. Kenneth Bretts. “She said, ‘I can’t believe it. The waiting room isn’t jammed. They brought me right in.’ In all the years she’d been seeing me, that had never happened,” said Dr. Bretts.

“The Fry Foundation is a thought leader in the Chicago area, and to tap into its insight was invaluable to us. The discussion is very much a dialogue about addressing systemic issues that impact the health of Chicago communities.”

Kathleen Gregory, Vice President of Strategy and Business Development, ACCESS
Patients at ACCESS appreciate the streamlined scheduling system that has decreased waiting times.
A three-year journey led to that patient’s pleasant surprise. In 2012, ACCESS, one of the nation’s largest community health center networks, knew it needed to make a change. A patient might wait weeks to get an appointment, and that visit then took an average of almost two hours. As a result, patients routinely didn’t seek medical care or show up for their appointments. And that kept ACCESS from fully achieving its mission: “We pride ourselves on being in the most vulnerable areas where patients may need the most help,” said Eddie Cruz, Vice President of Operations.

To improve the way it provides care to 175,000 mostly low-income patients at its 35 Chicagoland sites each year, ACCESS adopted a patient-centered medical home model of care, which puts patients’ needs first. This model streamlines operations, from registration to scheduling, and it provides greater coordination among the various healthcare teams that patients see. By making health care more efficient, the medical home model also makes it more accessible. As a result, patients see their own care not as a burdensome matter of tending to crises, but as a regular part of their everyday lives. To help it get there, ACCESS found a fitting partner in the Fry Foundation, which supports efforts to increase access to high-quality primary care by helping health centers implement patient-centered, comprehensive, team-based strategies.

At each ACCESS center, a team of providers and staff became that site’s change agents. The team physically followed patients throughout their visits, identifying the causes of, and the solutions to, any inefficiencies, such as scheduling delays.

Before the new model, walk-in patients were treated on a first-come-first-served basis, and patients who did make appointments called their own centers to do so—all of which resulted in bottlenecks. Now, providers’ days are partly scheduled and partly open, so when patients need to see a doctor the same day, they are able to do so. Staff members huddle every morning to coordinate the scheduled patients and to match providers with potential walk-ins. And rather than phoning each health center, patients make their appointments more quickly through one central hub.

Other changes were center-specific. For instance, while some centers determined all blood work would be most efficiently done in one area, others found it would be better if the staff drawing blood visited each patient’s room.

The teams continually consulted data, such as wait times and no-show rates, to find out what did and didn’t work. “Having each staff member understand the impact they can make on the data and what that means for the patient experience has been hugely valuable,” said Kathleen Gregory, Vice President of Strategy and Business Development.

ACCESS has made significant strides: The length of a patient’s visit fell from 110 minutes to 34 minutes; the no-show rate went from 22 percent to 14 percent; and the average next-available appointment dropped from 11 days to five days. Before this transformation, two-thirds of ACCESS patients described their care as excellent. Today, three-quarters of them do.

Patients now spend less time in the waiting room and more time with their providers. “This results in better outcomes,” said Dr. Bretts, “which is what it’s all about.”

Chicago, IL

For the Education Writers Association National Seminar in Chicago in 2019

$7,000
**Education, prosperity, and hope for all.** That is the vision behind the Fry Foundation's grantmaking. We provide support to nonprofit organizations that have the strength and commitment to improve conditions for low-income, underserved Chicago residents.

Grants are awarded in four major areas: **Arts Learning, Education, Employment, and Health.** Across all of our funding areas, our focus is on helping organizations:

- **Build** capacity to enhance the quality of services and better assess the impact of programs;
- **Develop** successful program innovations that other organizations in the field can learn from or adopt; and
- **Share** knowledge so that information which can help low-income communities and individuals is widely and readily available.

For FY2015, $436,000 of the grant award total was granted for convenings and collaborations in Employment and Health Programs.

Please visit our website at [www.fryfoundation.org](http://www.fryfoundation.org) to see our 2015 audited financials.
The **Lloyd A. Fry Foundation** supports organizations with the strength and commitment to address persistent problems of urban Chicago resulting from poverty, violence, ignorance, and despair. We seek to build the capacity of individuals and the systems that serve them. Our vision is a Chicago that offers education, prosperity, and hope for all.

The Foundation focuses on programs that improve conditions for low-income, underserved communities in Chicago, and we are especially interested in efforts that will foster learning and innovation.

We award grants in four major fields: **Arts Learning, Education, Employment, and Health**. Within these funding areas, we give priority to:

- Programs with a demonstrated record of high-quality, effective services
- Efforts to improve the quality and effectiveness of programs and services (these might include program design, evaluation or staff development efforts, among others)
- The development of innovative approaches that will contribute valuable examples, information, and knowledge to others working in the field

The Foundation also considers policy advocacy efforts that help ensure low-income communities and individuals in Chicago are treated fairly and have access to the services they need and deserve.

The Foundation is interested in investing in organizations and ideas that demonstrate exceptional potential for making a difference in one or more of the Foundation’s four grantmaking areas. These projects show promise of developing new information or program innovations useful to other organizations, institutions, and policymakers. In these cases, the Foundation will consider grants which represent larger or longer-term commitments than is otherwise typical.

In all reviews of proposals, we look for strong program designs with clear expected outcomes and specific procedures for assessing and evaluating progress.

Our funding guidelines are described below. For instructions on how to apply for a grant, please see our **Grant Application Procedures** section.

---

**Arts Learning**

Our Arts Learning funding focuses on programs for low-income Chicago children and youth that use the arts as a means to improve learning and provide life-enriching experiences. We are interested in efforts to improve the quality and expand the availability of arts education programs, especially in Chicago public schools. The Foundation supports arts education for students and professional development for arts educators, including classroom teachers.

In arts education for students, we give priority to programs that provide a combination of arts instruction, performance or exhibition experience, and exposure to the high quality artistic products offered by Chicago’s rich and diverse arts and cultural organizations. We look for programs that are artistically rigorous, engage students in the creative process, and assess student learning in the arts. In professional development for arts educators, we look for programs that immerse educators in the practice and study of the arts and present teachers with innovative strategies for teaching the arts, engaging students in the creative process, and assessing student progress.

We give priority to programs that provide ongoing support and expertise to teachers as well as provide access to arts and cultural resources for both teachers and students. The Foundation is also interested in proposals to convene experts to share information, facilitate discussion with arts educators, and help shape and strengthen arts education in Chicago public schools.

**Education**

The Education program has been a cornerstone of our grantmaking since the Fry Foundation’s inception. We are committed to increasing the academic achievement of low-income students in Chicago public schools. We support this goal through work that strengthens the preparation and development of principals to lead high performing schools and programs that provide rigorous academic enrichment opportunities for students. We also consider, by invitation, a limited number of proposals for teacher professional development that improve teaching in classrooms, are aligned with a school-wide instructional vision, and provide opportunities for teachers to collaborate with each other and with school leaders.
We look for programs that assess improvements in academic achievement and instructional quality and that monitor the ongoing effectiveness of their work. The Foundation encourages proposals that include efforts to enhance the quality of programs. These efforts might include incorporating new program elements, professional development for program staff, or the development of evaluation tools, among others.

The Foundation gives priority to programs working at the middle school and high school levels. We also will consider grant requests for policy advocacy when the connection to academic achievement is clear. We generally do not fund scholarship programs or unsolicited proposals from individual schools.

**Employment**

Our Employment program addresses our commitment to helping families and individuals move out of poverty. We support comprehensive job training programs that help low-income individuals improve their ability to compete for living-wage jobs and careers. We are particularly interested in supporting vocational training programs which are aligned with employment opportunities in critical industry sectors such as health care, manufacturing, and transportation; and adult education programs which integrate vocational training in order to advance low-skilled job seekers along educational and career pathways. Comprehensive job training programs which track graduates for at least six months up to a year after job placement will receive the highest priority.

We also recognize the need to improve the overall effectiveness of the workforce development system. We welcome proposals for policy advocacy efforts to improve the quality of job training programs and to increase access to education and training for low-income adults.

**Health**

The Lloyd A. Fry Foundation understands that effective primary care is essential to improving patient outcomes. The Foundation’s Health program is committed to increasing access to high-quality primary care and reducing health care disparities for Chicago’s low-income residents.

To accomplish these goals, we are interested in supporting: Efforts to implement medical home models of care which provide comprehensive integrated primary care services across multi-disciplinary team members in single or multiple settings. And we are especially interested in coordination efforts that focus on patients with chronic diseases that disproportionately affect communities of color (asthma, diabetes, heart disease, HIV/AIDS).

High-quality primary care services that are not widely available to low-income populations (especially dental, vision, and mental health). In support for mental health services, we give priority to high-quality family-based mental health treatment services for children who suffer from the effects of traumas stemming from abuse, neglect, or violence.

Community outreach to connect hard-to-reach individuals with high-quality primary care. We give priority to programs that partner with clinics and hospitals for referrals and follow up to ensure that patients show up at appointments and follow treatment recommendations. We are also interested in innovative partnerships with clinics and hospitals that demonstrate improved health outcomes.

Policy advocacy focused on improving the quality of health care and increasing access to health care for low-income populations in Chicago.

Programs must demonstrate linguistic and cultural competence and the ability to measure improvements in access to care and health status.

**What the Foundation Does Not Fund**

In general, the Foundation does not make grants to individuals, governmental entities, or 509(a)(3) supporting organizations, although exceptions sometimes are made for publicly supported charities. We also do not provide funding for: general operating expenses for new grantees, capital projects, endowments, fundraising events, political activities, medical research, or religious purposes.

We rarely fund unsolicited proposals from organizations based outside Chicago. When exceptions are made, we look for organizations with strong local board leaders who are responsible for establishing program priorities and policies in Chicago. In addition, organizations must agree that funds awarded for Chicago-based programs remain in Chicago and are not included in calculations of funds exchanged between local and national offices.
How to Apply
The Lloyd A. Fry Foundation makes grants in the following program areas: Arts Learning, Education, Employment, and Health. Please review the descriptions of our program areas before submitting a letter of inquiry or proposal.

We make grants only to tax-exempt organizations and rarely fund organizations outside Chicago. We give priority to proposals for specific projects rather than for general operating support. In our review of proposals, we look for strong program design, clear expected outcomes, and procedures for assessing and evaluating programs.

Letters of Inquiry
If you are seeking support for the first time or if you are a returning grantee seeking support for a new project, we highly recommend that you send us a letter of inquiry before you submit a full proposal. This would allow us to give you preliminary feedback concerning your request and its potential fit within our funding priorities. Letters of inquiry should include a brief description of the proposed project, a project budget, and other projected sources of support.

Proposal Application Procedures
We do not use a grant application form; we accept proposals of varying length that adhere to the procedures described below.

For new and renewal requests, full proposals should contain the following elements:

1. Brief history of the organization
   Narrative should include a general statement of the organization’s primary functions and goals.

2. Description of the project to be funded
   Please include the following:
   • A statement of the need to be addressed and the population to be served
   • A description of how the planned project will address the identified need
   • Clearly stated goals and objectives
   • Plans for assessing performance and monitoring progress toward program goals. Please identify at least three indicators or measures that you will track and analyze in order to understand the effectiveness of services provided; identify program strengths or challenges; or document potential long-term impact. A discussion of progress on these indicators during the grant period (and over time, if receiving more than one grant from the Foundation) should be included in grant reports. For further information, please review the Outcomes and Assessments section on our website which can be found under the How To Apply tab.
   • A timeline for project activities

3. Income and expense budget
   Include budget for the project during the duration of the grant period. The Foundation covers reasonable and appropriate administrative expenses. These should be explained in an accompanying budget narrative. For examples of administrative expense line items, please review the Allocating Program and Overhead Expenses article on our website which can be found in our Resources section under Real Costs.

4. Operating budget for the organization
   Include income and expense projections that pertain to the fiscal year in which the project will take place. Include the percentage of organization income received through earned income, government sources, individual gifts, corporate and foundation grants, and other sources.

5. List of current and projected funders
   Include a list of funders and amounts for both the organization and the project for the fiscal year in which the project will take place.

6. Organization’s most recent audited financial report

7. List of board members and their affiliations

8. List of organization’s professional staff and résumés of key project personnel
   Proposals for organizational capacity-building activities that involve outside consultants should include a copy of the consultant’s resume and a list of clients.

9. Racial and gender demographics of board and senior staff
   Additional demographics, such as sexual orientation or disabilities, also are welcome.

10. Organization’s Federal Employer Identification Number (EIN)
    Please note that the Foundation makes grants only to tax-exempt 501(c)(3) organizations. The Foundation rarely funds 509(a)(3) supporting organizations; exceptions sometimes are made for publicly supported charities.

11. Organization’s employment hiring policy

12. Full narrative and financial report on the previous grant (for returning grantees only)
    Final reports must be approved by the Foundation before a new request is considered. For agencies submitting a proposal to be reviewed one year from their last grant, the final reports will cover a ten-month period rather than a full twelve months in order to meet the materials deadline. We ask that final reports and proposals be submitted under separate cover. For more information on this subject, please review the After Grants Approval section on our website which can be found under the How To Apply tab.
Renewal Policy
An organization which has received five consecutive years of Fry Foundation funding will be asked to take a year off in seeking support for the following twelve-month period. The Foundation recognizes that there may be unusual circumstances in which support for one additional year may be appropriate. While we wish to be flexible in recognizing the needs of our grantees, there will be few exceptions to this policy.

Following a year off, grantee organizations are welcome to apply for renewed support. These proposals will be evaluated under the Foundation’s grantmaking guidelines. As with all proposals, these should target Chicago residents in financial need.

For further clarification of the Foundation’s grantmaking priorities, please refer to the Grantmaking Program Areas section on the preceding pages.

Submission Dates and Board Meetings
The Board of Directors meets quarterly to consider requests for grants. These meetings are held in February, May, August, and November.

In each of those meetings, the Foundation will review proposals in three of the four program areas on a rotating basis; one program each cycle will not review proposals.

We must receive your proposal by 5 p.m. on the deadline date in order to review it at the corresponding board meeting. In the event that a deadline falls on a weekend or holiday, requests may be submitted by 5 p.m. on the following business day.

Proposals and letters of inquiry should be sent to:

Ms. Unmi Song
President
Lloyd A. Fry Foundation
120 S. LaSalle Street
Suite 1950
Chicago, IL 60603-3419

or by email at applications@fryfoundation.org
